

Computer Science

The new multidisciplinary
open access journal

PeerJ Computer Science is the new multidisciplinary open access journal covering all subject areas in computer science. **Submit your article today!**

Open Access, Open Review

Everything we publish is 100% open access (CC-BY 4.0). We offer optional open peer-review correspondence alongside your article.

300+ Editors across all disciplines

More than 300 senior editors and advisors are working with us to make *PeerJ Computer Science* the most exciting and prestigious cross-disciplinary computer science journal online.

Innovative publishing platform offering

- Preprint server – submit a draft and we'll publish it for free within 24 hours
- Fast, efficient and easy to use peer-review article submission process via our bespoke publishing platform
- Article readership statistics – see where your article is being read, and by how many
- Article, image, dataset and review DOI's – helpful in identification, reuse and citing
- Source code publication

Robust, fair, fast peer-review

PeerJ is currently delivering a first decision in 22 days in biomedical peer review – we want *PeerJ Computer Science* to operate at this speed too.

Lifetime publishing for \$99

Pay \$99 (once) and publish a peer-reviewed article every year for the rest of your life. Every article author needs a plan to publish. Preprint publishing is free and unlimited.

For a limited time we are offering free publishing if you sign up now – offer expires 3 August 2015

Backed by O'Reilly Media and SAGE

Invested in by Tim O'Reilly (via O'Reilly Media and O'Reilly AlphaTech Ventures) and SAGE Publications, as well as backed by an Advisory Board of computer science luminaries, *PeerJ Computer Science* is well placed to meet and address the changing needs of the computer science community.
